

## Lab Report Template

Copy the template found below and use it to help you write your lab reports until you feel confident writing them without the prompts. You may type within the text boxes, and they will expand as you add more text. If you have questions or need help with lab report writing, please reach out to us at [info@journeyhomeschoolacademy.com](mailto:info@journeyhomeschoolacademy.com)

**Title:** Write a descriptive title indicating exactly what you're testing.

**Introduction:** Describe the problem in 1-3 paragraphs and explain why you are doing the lab, along with background information about what is already known about this problem.

**Hypothesis:** Before beginning your laboratory assignment, write a statement indicating what you expect to happen and why in 1-2 sentences.

**Materials:** List the materials necessary to complete this lab.

**Procedure:** Using a numbering system, write the steps taken to complete the lab. Be sure to include any ways in which your procedure deviated from those listed in the instructions.

**Results:** Compile all your collected results, including all tables, charts, or numerical data.

**Conclusion & Discussion:** Interpret the data you collected, indicating whether your hypothesis was supported or not, and include answers to any discussion questions in this section.
